vaccinations
per day

7-DAY AVERAGE AS OF 3/3/2021

GOAL:
45,000
vaccinations
per day

**Vaccinate
WA** 

CovidVaccineWA.org

COVID-19 IN WASHINGTON STATE Where and when are vaccinations being given?

DATA AS OF 3/6/2021 11:59 PM PT

This chart shows the number of COVID-19 vaccines given in Washington state facilities and reported to the state. Vaccine doses given reflects the data reported to the state as of the latest update date. Please note, the measures "vaccines given" and "people vaccinated" are not comparable. Vaccines given counts number of doses given in a location. People vaccinated counts number of Washington residents initiating vaccination and becoming fully vaccinated. Numbers may not always align since people may live in a different county than where they got vaccinated. Vaccination data are updated on Mondays, Wednesdays, and Fridays only. [Learn More](#)

Jansseen (Johnson & Johnson) Vaccine Receives EUA

- FDA issued an emergency use authorization (EUA) for the Janssen COVID-19 vaccine candidate on February 27th
- Advisory Committee on Immunization Practices (ACIP) voted to recommend the Janssen vaccine for those 18+ on February 28th
- Western States Scientific Review Workgroup recommends vaccine on March 2nd
- Janssen vaccine is a one dose vaccine
- Clinical trial data showed it to be 66% effective against moderate to severe COVID-19 disease
- Washington received our first allocation of the Janssen vaccine the first week in March: 60,900 doses
- Washington was told that we will not receive additional Janssen vaccine until end of the month
- Janssen vaccine won't significantly boost supplies right away

3 Week Forecast

| | March 07, 2021 Forecast For Week Ending | March 14, 2021 Forecast For Week Ending | March 21, 2021 Forecast For Week Ending |

WASHINGTON'S COVID-19 VACCINE PHASES

Phase 1 Estimated Start Dates (Tiers A and B)

Find out if it's your turn at [FindYourPhaseWA.org](https://www.findyourphase.org)

FOCUS ON EQUITY: This approach prioritizes population groups who have been disproportionately impacted by COVID-19 due to external social factors and systemic inequities, including people of color; people with limited English proficiency; people in shared housing, crowded housing, and multigenerational homes; people in poverty and low-wage earners; people with disabilities that are connected to underlying health conditions that may put them at higher risk of COVID-19; and people with access barriers to healthcare. The [social vulnerability index](#) is one of several inputs informing equitable vaccine allocation.

NOTE: Immigration and health insurance status do not impact eligibility.

The timeline represented here is tentative and subject to change based on vaccine supply and demand.

PreK-12 Educators, Staff, and Child Care Workers

- Educators are encouraged to receive their vaccine through the Federal Retail Pharmacy Program, which will prioritize them at their sites through the end of March.
- Currently there are six pharmacies in Washington involved in the Federal Retail Pharmacy Program: Safeway/Albertsons, Walmart, Costco, Rite Aid, Health Mart Independent Pharmacies, and Kroger.
- This week these pharmacies will receive a total of 65,000 doses of vaccine.
- Next week they will receive 72,000 doses.
- This is in addition to the allocation Washington receives each week.
- Using the Federal Retail Pharmacy Program, we believe we will be able to administer first doses to educators across the state by the end of March.

Strategies to Ensure Equitable Access

1. **Prioritize communities with higher social vulnerability** to COVID-19 by using [Washington Tracking Network, Information by Location Mapping Tool: COVID-19 Social Vulnerability Index](#).
2. **Address work schedule barriers** through:
 1. Evening & weekend appointments
 2. Onsite, employment-based vaccine clinics
 3. Encouraging employers to provide paid time for getting a vaccine
3. **Address language barriers** through:
 1. Translation of materials
 2. Culturally & linguistically appropriate outreach
 3. Interpretation services
4. **Promote vaccine trust and confidence** by partnering with trusted community leaders and members.
5. **Focus on the hard to reach groups** – put more effort into reaching the people who will be missed by traditional channels.
